A water main installation will lead to the loss of water pressure in the area of 1st Street SE and 2nd Avenue SE; and Main Street South between the bridge and 2nd Avenue SE of the Carman distribution system. Distribution depressurization can compromise the safety of the water supply; therefore, a precautionary boil water advisory has been issued to ensure public health protection.

Until further notice, all water used for consumption should be brought to a rolling boil for at least one minute before it is used. The precautionary Boil Water Advisory will remain in effect until the water supplied by this water system no longer presents a risk to public health and should be able to be lifted by Tuesday, August 2nd. **Please check the Town website for updates on this.**

If you have any questions, please contact the Water Plant at 204-745-2481 or the Town of Carman office at 204-745-2443.

Thank you for your patience.
